## EDUCATION

---

- **University of Milan** Milan, Italy  
*Bachelor's of Science in Computer Science* Feb 2025

## EXPERIENCE

---

- **PwC** Milan, Italy  
*Software Engineer* Mar 2025 - Aug 2025  
Design and development of fullstack components for a wealth management application. Worked on change requests to improve business logic consistency and data integrity across financial modules.
  - **Technologies:** Java, Spring Boot, Angular, Oracle SQL
- **Connects Lab** University of Milan  
*Research Internship* Oct 2024 - Feb 2025  
Simulation and analysis of a platooning system for autonomous driving, evaluating the reliability of V2V communication using DSRC technology.
  - **Technologies:** OMNeT++, SUMO, Python, C++
  - **Objective:** Assess the impact of network congestion on platoon stability and optimize RAT selection for vehicular communication.
  - **Contributions:** Developed realistic simulation scenarios and generated datasets for training a Machine Learning model.

## PERSONAL PROJECTS

---

- **Social Network for Music**  
Web application that enables users to create and share playlists, integrating the Spotify API.
  - **Technologies:** Node.js, Express, MongoDB
  - **Features:** Built a REST API with a responsive design
- **University Portal**  
Platform for university administrative management, providing a personalized interface for secretaries, teachers, and students.
  - **Technologies:** PHP, PostgreSQL
  - **Database:** ER Schema, Relational Database

## PROGRAMMING SKILLS

---

- **Languages:** Java, Python, Javascript, Golang, PHP, C++
- **Database:** PostgreSQL, MySQL, Oracle SQL, MongoDB
- **Technologies:** Docker, Git, Gradle, Maven, Spring Boot, Angular
